Infant Transport Mattress

Cat. No. 916501

Intended Use
Infant transport mattress warmer with disc is used for providing warmth during the transport of an infant within the hospital or between hospitals.

Features
Infant transport warmer helps to maintain an infant's body temperature during transportation, reducing the risk of hypothermia and complications caused by hypothermia.
Infant transport mattress can be applied directly to the baby's skin without the need for additional coverings or layers.
The fabric side of the infant mattress warmer is cozy and soft, helping to reduce the baby's discomfort and tension and enhance a sense of security.
Single-use
Latex-free

Infant Transport Mattress

Cat. No. 916501
