

Infant Positioning Aids

Infant Positioning Aids are specially designed devices to support and promote proper positioning of infants during the Neonatal Intensive Care Unit (NICU). These Positioning Aids are aimed at helping infants stay in a safe and comfortable position, which aids their growth and decreases the risk of complications such as apnea and reflux.

Boen Healthcare's Infant Positioning Aids are an effective way to keep babies in the position they need to be in a variety of situations, whether sleeping or undergoing medical procedures.

Infant Positioning Aids

SnuggleUp

SnuggleUp is designed to provide proper positioning and physiological stability for premature and sick infants. The padded foot enclosure and soft straps hold the infant in place while providing a sense of security so that the infant can be weighed, moved, examined, or transported in comfort.

Material: Cotton(Fabric), Silk Wadding (Lining), Polyester (Bottom)

Size:

S (for babies around 35cm in length)

M (for babies around 40cm in length)

L (for babies around 45cm in length)

Cat. No.	Description	Qty/Case
C923801	Infant Positioning Aid, SnuggleUp, Reusable, S	50
C923802	Infant Positioning Aid, SnuggleUp, Reusable, M	50
C923803	Infant Positioning Aid, SnuggleUp, Reusable, L	50

Disposable SnuggleUp

Disposable SnuggleUp is also used as Disposable Pad Cover in the treatment of neonatal jaundice, placing on the fiber optic blanket of the phototherapy unit to separate the newborn from the blue light blanket to reduce cross infection.

Material: Non-Woven

Size:

S (for babies around 35cm in length)

M (for babies around 40cm in length)

L (for babies around 45cm in length)

Cat. No.	Description	Qty/Case
C922801	Infant Positioning Aid, SnuggleUp, Disposable, S	50
C922802	Infant Positioning Aid, SnuggleUp, Disposable, M	50
C922803	Infant Positioning Aid, SnuggleUp, Disposable, L	50

Infant Positioning Aids

Bendy Bumper

Bendy Bumper is designed to resemble the borders of the uterus, providing reflex stimulation for infant limb extension and recoil. Built-in metal rods can be bent to the proper shape and retain the shape until the next bend.

Material: Cotton Cover, Sponge, Metal Rod (Coated With Plastic)

Size: 85cm x 7.5cm x 5.5cm

Cat. No.	Description	Qty/Case
C924001	Infant Positioning Aid, Bendy Bumper	10

Prone Plus

Prone Plus provides ventral support for infants. The unique hourglass shape helps babies maintain a secure position in the prone position.

Material: Sponge, Cotton Cover

Size:

S (for babies around 35cm in length)

M (for babies around 40cm in length)

L (for babies around 45cm in length)

Cat. No.	Description	Qty/Case
C923901	Infant Positioning Aid, Prone Plus, S	50
C923902	Infant Positioning Aid, Prone Plus, M	50
C923903	Infant Positioning Aid, Prone Plus, L	50

T Frog

T Frog is an infant positioning aid placed around the head, neck, hips or limbs for positioning and tactile support.

Material: Polypropylene Particles, Cotton Cover

Size: 20cm x 26cm

Cat. No.	Description	Qty/Case
C924101	Infant Positioning Aid, T Frog	50
