Technical Data Sheet

Hypodermic Needle

Cat. No. 411300-411330

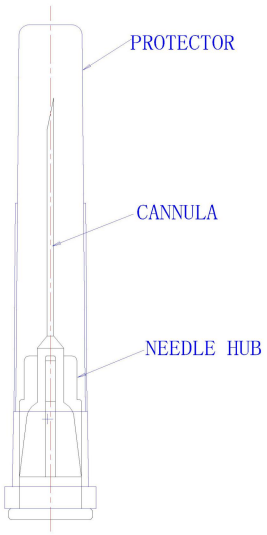

Intended use

Disposable hypodermic needle is suitable to be used for hypodermic injection, skill test, blood collection, and preparation of the medicine solution and reagent.

Component

Disposable hypodermic needle consists of the needle hub, stainless steel cannula, and protector.

Application

Disposable hypodermic needle is an assembly of the needle hub, stainless steel cannula, and protector.
The hub and protector are made by medical grade PP mold injection, and the grade is 1600E.
The hypodermic needles are non-hemolysis, non-toxicity, non-agile, non-urgent toxicity, and non-intradermal stimulus-response.
All physics, chemical, and biology indications measure up.

Cat. No.	Gauge	Color Code	Qty/Case (Pcs)
411300	30G	Yellow	5000
411301	29G	red	5000
411302	27G	grey	5000
411305	26G	brown	5000
411307	25G	orange	5000
411310	24G	purple	5000
411313	23G	blue	5000
411316	22G	black	5000
411319	21G	green	5000
411323	20G	yellow	5000

Hypodermic Needle

Cat. No. 411300-411330

411325	19G	beige	5000
411328	18G	pink	5000
411330	16G	white	5000

Instruction for use
Open the unit packing, take out the needle cap, connect with hypodermic syringe or infusion set, absorb the solution or make the hypodermic injection.

Attention
The users have to understand some medical knowledge.
Promptly use once after the unit packing is opened.
The sterile needle is designed for single use only, and discarded after use.
The shelf life of the medical needles is five years after EO sterilization, check the expiry date before use.
Don't use it if the unit packing is damaged, or contaminated, or if some foreign matters are inside.

Transportation & Storage
Heavy pressure, direct sunlight, raining and snowing soak shall be avoided during the transportation.
The hyperdermic needle have to be stored at a place with relative humidity not over than 80%, no corrosive gas, cool and dry, clean and good ventilated.

Production environment and sterilization method.
All components should be in 100,000 class cleaning workshop from producing to assembling. The medical needles should be sterilized by EO after finishing outer carton packing.

Shelf life: 5 years
